[ankitjhamca@gmail.com](mailto:ankitjhamca@gmail.com)

## SUMMARY

Ankit has expertise in web development and full-stack technologies, specializing in JavaScript, React.js, Node.js, and MongoDB. He is having Hands-on experience in building responsive web applications, integrating third-party APIs, and deploying scalable solutions.

## EXPERIENCE

 **Jr. Software Developer Intern**  
**LeopardRuns Innovation & Technology**

06/2024 - 09/2024 | Bhopal

Internship focused on software development.

- Successfully completed a 3-month internship focused on software development.

## EDUCATION

 **Master of Computer Application (MCA)** CGPA :8.62

L.N.C.T. College

08/2023 - 05/2025 | Bhopal

 **Bachelor of Computer Application (BCA)** Percentage :74.03

T.N.B. College

08/2019 - 05/2022 | Bhagalpur

## PROJECTS

### Beat Box

<https://beatbox-ankit.vercel.app/>

A music player web application.

- Successfully designed and deployed a web application utilizing React.js, Tailwind CSS, Jio Saavn API and Local Storage.
- Fetch and displayed song details using API responses.
- Implemented features for searching song, downloading songs with one click and adding or removing favorite songs.

### Medium Clone

<https://medium-clone-by-ankit.vercel.app/>

A blog application with various features.

- Proficiently designed and deployed a blog application using React.js, TailwindCSS, Node.js, Express.js, Multer, Cloudinary, and MongoDB.
- Developed a user-friendly interface featuring multiple blog categories, user authentication and authorization, blog uploads, blog search functionality, like/unlike options, and comment capabilities.

### Meal Mate

<https://meal-mate-food-order.vercel.app/>

A food application for seamless food ordering experience.

- Developed a web application using React.js, TailwindCSS, TheMealDB API, Node.js, Express.js, Stripe Payment Gateway, and MongoDB.
- Designed user-friendly modules for both users and administrators to ensure a seamless experience.
- Implemented admin functionalities to add and delete food items, update order status, and view a list of user messages.
- Integrated TheMealDB API to fetch meal data, allowing users to add items to the cart, remove items, and place food orders.

## KEY ACHIEVEMENTS

### Hacktoberfest Contributions

Successfully completed Hacktoberfest 2023 and 2024, contributing to multiple open source projects.

### Consistent GitHub Contributions

Made 1100 commits on Github in 2023 showcasing consistent contributions to software development.

## SKILLS

API	C++	bootstrap	CSS	Express.js
Git	Github	HTML	Java	Javascript
MongoDB	Netlify	render	node.js	
OpenSource	Socket.io	react.js	SQL	
Redux	Responsive Web	Routing	Stripe	
tailwind	Next.js	typescript	vercel	
VSCode				

## CERTIFICATION

[Simplilearn JavaScript certificate](#)

[Frontend Development With ReactJS](#)

[Infosys java s8 features certificate](#)
